

Leonard Sibomana

**Department of Environmental Science and Management
Ardhi University**

Biography

Mr. Leonard Sibomana is an Environmental Expert with BSc in Environmental Engineering and MSc in Environmental Technology and Management (Candidate). He is currently employed by Ardhi University as Tutorial Assistant. His major fields of specialization includes Water Supply and Sanitation, Research Methodology, Water pollution prevention and control, Environmental Planning and Impact Assessment, Water Resource and Solid Waste Management.

Mr. Leonard Sibomana has involved in various research studies including assessment of heavy metals bioaccumulation in vegetables grown along Msimbazi River and assessment of communicable diseases and their engineering control in Dar es Salaam.

Besides, he has carried-out some qualitative and quantitative surveys with different organizations including Economic Development Initiatives (Kagera Health and Development Survey, Pedometer projects), World Bank (Baseline survey for Tanzania Virtual Business Incubator Project), Mathematica Policy Research Inca (Baseline survey for Energy Sector Evaluation), Innovation for Poverty Alleviation (IPA) under the project Investigation of the agro dealer competition for the impact evaluation of Tanzanian's National Agricultural Input Voucher Scheme. He has worked with Network for Water and Sanitation (Inventory survey of water supply in Tabora Region done in collaboration with JICA), and Concern Worldwide under Water and Environmental Health Program in Ngara District.

He is a member of Tanzania Engineers Registration Board (ERB) as Graduate Engineer and member of Institute of Engineers Tanzania (IET).
